Information

Introduction

This report provides an overview of the water quality in the Galway Bay North Catchment and the pressures impacting on water quality. This report is based on data up to 2021. The latest water quality data, dashboards and maps throughout this report are available on catchments.ie and [EPA Water Map](https://epa.ie/water-map).

The Galway Bay North Catchment includes the area drained by all streams entering tidal water between Nimmo's Pier and Slyne Head, Co. Galway, draining a total area of 936km². The largest urban centre in the catchment is the western part of Galway City. The other main urban centres in this catchment are Berna and An Spidéal.

The Galway Bay North catchment is divided into nine subcatchments with 43 river waterbodies, 146 lakes, 27 transitional, eight coastal waterbodies and 14 groundwater bodies.

[View the Galway Bay North Catchment on the EPA Water Map](#)

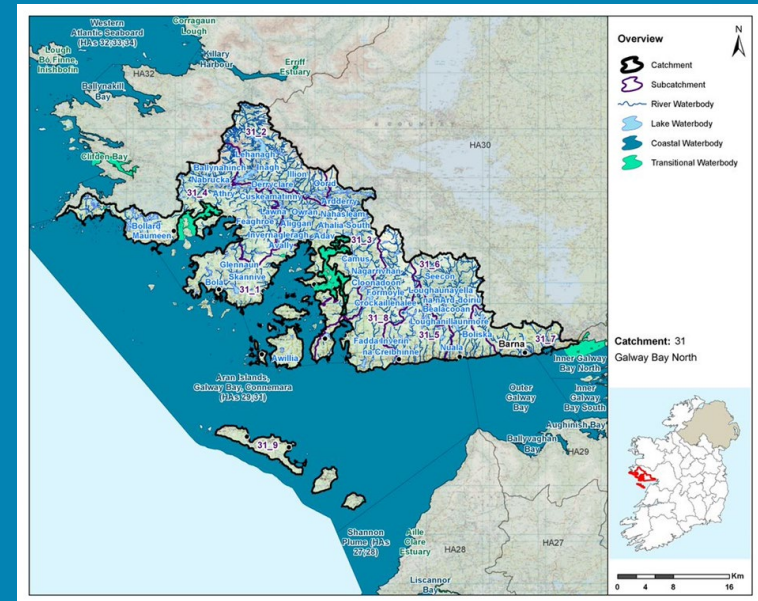

Previous Catchment Assessments

Previous catchment assessments, which provide additional historic context and information, are archived on catchments.ie:

- [Cycle 2 Catchment Assessments – published September 2018](#)
- [Cycle 3 Draft Catchment Assessments – published September 2021](#)

Online Dashboards

Links to online dashboards are provided in this report – these numbers may vary from those in this document as time progress and the online dashboards are updated based on the latest data and scientific assessments.

Summary Information

The dashboard below provides a breakdown of water quality status for surface and groundwater bodies in the Galway Bay North Catchment.

A total of 87% of surface waterbodies were at Good or High Ecological Status in the 2016-2021 monitoring period. One hundred percent of groundwater bodies were at Good status.

High Status Objective Waterbodies

High status waters are prioritised for protection and action.

There are 13 waterbodies with a **High Ecological Status Objective (HSO)** in the Galway Bay North Catchment, with five currently not meeting their environmental objective of High.

Grants for septic tank upgrades may be available in high status objective catchment areas - you can learn more and check your Eircode for eligibility here: <https://www.gov.ie/en/publication/6cc1e-domestic-waste-water-treatment-systems-septic-tanks>

Water Quality Changes

Below illustrates the changes in ecological status in monitored surface waterbodies over the last five monitoring cycles in the Galway Bay North Catchment. Nationally while there have been improvements in some waterbodies, these have been offset by declines elsewhere.

Ecological status trends for monitored surface waterbodies over the last five monitoring cycles in the Galway Bay North Catchment.

Summary
Information

Significant Pressures driving risk

Significant pressure types impacting the 14 *At Risk* surface waterbodies are broken down in the figures below, including significant pressure information for the three *At Risk* High Ecological Status Objective waterbodies.

The issues driven by these pressures are mainly altered morphological condition (habitat), nutrient pollution and organic pollution impacts. For more information, see <https://www.catchments.ie/data/#!/dashboard/pressure?k=i351zs>.

Go to the Summary Information section to get significant pressure and issue data for At Risk waterbodies within the Galway Bay North Catchment.

Priority Areas for Action

A number of waterbodies have been prioritised through the selection of Areas for Action. There were two Priority Areas for Action identified for the second river basin management planning cycle in the Galway Bay North Catchment. This has increased to a total of five Areas for Restoration, three Areas for Protection and one Catchment Project for the third cycle. ***Go to the summary information section to get Area for Action information for waterbodies within the Galway Bay North Catchment.***

Types of Areas for Action under the third cycle River Basin Management Plan

- View the current progress of Areas for Action and Summary Reports completed by LAWPRO, on catchments.ie and the EPA Water Map:
 - <https://www.catchments.ie/data/#/areaforaction>
 - https://gis.epa.ie/EPAMaps/default?eastings=?&northing=?&lid=EPA:WFD_AreasForAction
- LAWPRO have also published detailed desktop studies on Prioritised Areas for Action (PAAs) which are available their website: <https://lawwaters.ie/desktop-studies/>
- Information on Areas for Action for the second cycle is available in Cycle 2 Catchment Assessments which have been archived on catchments.ie: <https://www.catchments.ie/download/cycle-2-catchment-assessments-published-september-2018/>
